PROFILE

Creative DevOps maestro with a solid software engineering core who turns chaos into code and infrastructure into art with over 4 years of hands-on experience building user-focused applications, automating cloud infrastructure, optimizing deployment pipelines, and keeping applications running like clockwork. Known for bridging development and operations with ease, I bring a sharp eye for code quality, a passion for performance, and a talent for building systems that scale effortlessly. Proven track record of reducing deployment times, boosting reliability, and empowering agile teams to ship with confidence.

SKILLS

DevOps Arsenal: AWS, Azure, Kubernetes, Docker, Terraform, Ansible, Jenkins, GitHub Actions, GitLab CI/CD

Monitoring & Telemetry: Prometheus, Grafana, CloudWatch — eyes everywhere, alerts before the chaos

Scripting: Bash, Python — from zero to "why didn't we do this earlier?

Code Craft: JavaScript, TypeScript, Node.js, React, Next.js — full-stack fluency with a frontend finesse

EXPERIENCE

DevOps Engineer, City Spaces and Bookings, Remote -
Jan 2023 - Present
- Built sleek, no-fuss CI/CD pipelines with GitHub Actions and Bash — slashed manual deployment work by 60%

- Wrote infrastructure as code in Terraform and Ansible to make cloud provisioning smooth, consistent, and 30% more error-resistant.

- Spearheaded system monitoring with Prometheus and Grafana – caught issues faster, used resources smarter.

- Containerized apps with Docker and Kubernetes, boosting deployment speed and reliability, enabling faster feature releases.

- Built web applications using Next.js, TypeScript, and Tailwind CSS.

FullStack Engineer, Smartchain Limited, Remote-

Oct 2023 - Jan 2025

- Implemented Azure DevOps CI/CD pipelines, cutting deployment time by 40%.

- Developed a React and Node.js dashboard, reducing admin task times with real-time metrics.

- Built scalable React and TypeScript web apps, boosting user engagement.

- Write Bash scripts to automate build and test workflows, enhancing efficiency.

- Collaborated on a zero-downtime Azure migration, earning a team excellence award.

DevOps Engineer, Metalloids Limited, Lagos , Nigeria -

Aug 2021 - Dec 2022

- Built a GitLab CI/CD pipeline for a Java Spring Boot app with Gradle, AWS S3, and Elastic Beanstalk, cutting manual deployment time by 80%.

- Automated infrastructure with CloudFormation, cutting provisioning errors by 90% and keeping chaos at bay.

- Teamed up for a zero-downtime migration to EKS using ECR, CodePipeline, and CodeCommit, pulling off a seamless switch with flair.

- Containerized microservices using Docker and deployed to Kubernetes clusters, boosting deployment reliability and scalability.

- Set up Traefik and Blackbox Exporter for secure routing and system monitoring, boosting SSL reliability and uptime visibility

- Configured various performance metrics using AWS Cloud watch & Cloud Trail for monitoring and metrics tracking

**DevOps Engineer Intern, Terragon Group, Lagos , Nigeria -
Jan 2021 - Apr 2021**

- Collaborated with DevOps and engineering teams to troubleshoot deployment issues, speeding up deployment cycles and reducing errors.

- Assisted in maintaining Jenkins pipelines by troubleshooting failed builds and tweaking stages for smoother automation.

- Sat in on team standups and sprint planning sessions, getting a real feel for DevOps in action.

- Documented internal DevOps processes, making it easier for new team members to onboard.

EDUCATION

Federal University of Technology Akure, Ondo State

BSc, Human Anatomy | Nov 2015 – Dec 2019

- Sharpened problem-solving chops, paving my tech journey.
